

everyoneon
ANNUAL REPORT 2015

June 2016

Friends,

2015 was a year of tremendous change and growth in the work of EveryoneOn. As the new CEO at EveryoneOn, I am so proud of what we achieved but even more excited about what we will be able to accomplish going forward to end the digital divide once and for all. To date, we have helped connect almost 300,000 low-income people in 48 states to the Internet and the opportunity it brings. Furthermore, we have positioned ourselves for even greater success by entering into innovative partnerships with organizations like American Express, Univision, and the Obama administration to take quantum leaps forward in digital inclusion.

This year, our staff grew by more than 50 percent by adding a new chief programs officer and three new regional managers, who are getting families connected in North Carolina, Georgia, and Florida. EveryoneOn serves as the lead non-profit partner with U.S. Department of Housing and Urban Development (HUD) on the ConnectHome initiative, which aims to connect more than 200,000 kids and their families living in public housing. Through this on-the-ground work that we do with our more than 600 partner organizations, we aim to connect an additional 350,000 low-income households or roughly an additional one million low-income people to the American dream via the Internet. Even more importantly, we are creating next-generation practice and writing the new playbook for digital inclusion.

Through our partnership with American Express in Clarksdale, Mississippi, we are connecting an entire high school of students to the Internet, getting them financially literate, and preparing them to be potential AMEX customers. This is the first of many pilots that we seek to launch to show that every business has a stake in breaking the broadband barrier and that doing so is good for the bottom line.

We have also made our voice heard in Washington, D.C. to make sure that there is a telecommunications policy framework that benefits the families that we serve. This is exemplified in our work to bring a reform of the \$1.5 billion Lifeline program, which was passed by the Federal Communications Commission (FCC) in the spring of 2016. We now await the final application of the reform that we believe will make the Internet accessible for an additional five to 15 million low-income Americans.

We believe that if we can do all these things that we will close the digital divide in our time for more than 64 million Americans who are not online. Until that time comes, our team at EveryoneOn will continue to work tirelessly to connect families to the tools and technology needed to seize their digital destinies. However, cannot continue to bridge the digital divide without the help of our generous partners. For that support, we thank you.

This is our 2015 report, which will highlight the work we have done in the last year and our plans for 2016 and beyond. Right now, there are millions of low-income unconnected Americans and we are ready to get them connected. Thanks again for supporting our efforts and we look forward to working with you in 2016.

Best wishes,
Chike Aguh
Chief Executive Officer
EveryoneOn

THE PROBLEM

Technology has changed the way we do business, pursue education, find jobs, and interact with everyone from our family to our doctor to members of Congress. Yet nearly **one in five Americans do not use the Internet** at all.

These Americans are disproportionately from low-income and minority communities. As 80 percent of students need the Internet to do their homework and 90 percent of job applications are online, these disconnected Americans risk becoming increasingly isolated from our digital society because they lack access to the Internet and the skills necessary to use it effectively.

One in four U.S. households suffer from lack of home Internet access.

This is called the **DIGITAL DIVIDE** and it is an ongoing and completely solvable problem.

We aim to eliminate the digital divide by delivering high-speed Internet, computers, and digital training to all unconnected Americans. **In short, we believe that no matter where you live, how much money you make or who your parents are, you should have access to the Internet and the opportunity that it provides.**

We want to get this number up to 100%.

Data from U.S. Census Bureau 2012 and American Community Survey (2013)

In May 2011, former FCC chairman Julius Genachowski issued a challenge: close the broadband adoption gap. From that challenge and seeing the ever-growing digital divide in the United States, Connect2Compete was founded.

Connect2Compete marked an unprecedented collaboration of government, corporate, philanthropic, and community leaders committed to harnessing technology to improve the lives of low-income Americans. Soon it became a standalone nonprofit aimed at eliminating the digital divide by providing high-speed, low-cost Internet and devices, as well as free digital literacy and training to families with children eligible for the National School Lunch Program.

While we still work to serve these families, specifically through our work with Sprint, we realized there was a larger population that needed to be helped—and that's how Connect2Compete transitioned into EveryoneOn.

Initially a public awareness campaign and digital inclusion pilot, EveryoneOn soon became its own nonprofit. EveryoneOn now works to provide **affordable Internet access, devices, and digital literacy training to all Americans.**

To date, EveryoneOn has helped connect nearly 200,000 families and is ready to connect more.

It's been a big year and we are excited to continue our work in ending the digital divide.

"I WANT TO GIVE CREDIT WHERE CREDIT IS DUE. THIS IS NOT SOMETHING GOVERNMENT DOES BY ITSELF. I'M PROUD TO SAY THAT FOLKS AROUND THE COUNTRY ARE STEPPING UP TO DO THEIR PART[...] YOU'VE GOT NONPROFITS LIKE EVERYONEON [...] WHO ARE GOING TO HELP MAKE [CONNECTHOME] WORK ON THE GROUND. SO WE'VE GOT SOME GREAT BUSINESSES AND SOME GREAT NON-FOR-PROFITS WHO ARE PARTNERING WITH US ON THIS."

***-- PRESIDENT BARACK OBAMA
REMARKS BY THE PRESIDENT ON LAUNCH OF
CONNECTHOME INITIATIVE***

In 2015, EveryoneOn staff experienced both growth and change, including the addition of the new role of chief programs officer and the expansion of our regional teams to include Charlotte, Macon and Miami. In addition, we saw staffing changes, including a leadership transition (early 2016) with the departure of the founding chief executive officer. In the coming year, we expect continued growth on the regional level in several key markets, along with new hires to help our national level work.

Current staff members include:

<p>Chike Aguh Chief Executive Officer</p>	<p>Vin Menon President & Chief Operations Officer</p>	<p>Veronica Creech Chief Programs Officer</p>
<p>Norma Fernandez Senior Director of Strategic Partnerships</p>	<p>Sarah Graham Communications & Marketing Manger</p>	<p>Amber Petty National Programs Coordinator</p>
<p>Paul Johnson Operations Manager</p>	<p>Kurt Peluso Regional Manager, New Jersey</p>	<p>Paulina Chavez Regional Manager, Los Angeles, CA</p>
<p>J'Tanya Adams Regional Manager, Charlotte, NC</p>	<p>Jessica Walden Regional Manager, Macon, GA</p>	<p>Maribel Martinez Regional Manager, Miami, FL</p>
<p>Rania Ahmed Regional Manager, Bay Area, CA</p>	<p>Nolen Young Technology Manager</p>	

BOARD AND ADVISERS

We are deeply appreciative of our **Board of Directors and Advisers** who provide invaluable insight and support. Comprised of leaders from the nonprofit, philanthropic, government, financial, and communication sectors, our Board is integral to the success and future of our digital inclusion work. In the coming year, we will be recruiting more members to expand the group.

Monique Woodard, Black Founders

During 2015, EveryoneOn experienced tremendous growth with new programs and partners, major national events, and with telling the stories of those on the wrong side of the digital divide.

Programs and Partners

ConnectED

As part of the [ConnectED Initiative](#), EveryoneOn belongs to a coalition of diverse organizations dedicated to ensuring that all students have access to technology in the classroom and at home. EveryoneOn has specifically partnered with [Sprint](#) to connect 50,000 K-12 students across the nation with free Internet service on Sprint's 4G LTE network. We've generated awareness about Sprint's ConnectED offer and assisted over 30 schools and school districts with the application process. These schools and districts have requested over 20,000 lines of Internet service; roughly 2,700 hotspots have been ordered to date. Students will receive four years of free Internet from Sprint.

Examples of successful Sprint ConnectED recipients include:

School for Extended Educational Options (SEEO), Pomona, CA--After conducting a survey to assess the need for Internet connectivity at home, SEEO, a charter school for at-risk high school students, applied for the Sprint ConnectED program and was granted 360 Internet service lines. To engage students and families in SEEO's digital learning initiative and distribute the Sprint hotspots, the school hosted a workshop. EveryoneOn assisted SEEO through the application process, hotspot deployment planning, and facilitated the Internet safety portion of the workshop. Since providing students with the Sprint hotspots, SEEO has reported an increase in completed online homework assignments and increase in completed credits. Mission accomplished!

My Brother's Keeper, Newark, NJ--EveryoneOn partnered with My Brother's Keeper, the Newark Housing Authority, the Prudential Foundation, and the Mayor's office to connect 1,000 students. This private-public partnership allowed us to utilize all the resources available to have an impact on the students of Newark. To further their education on technology, My Brother's Keeper has since offered coding classes and after school tech programs.

ConnectHome

“For families here, at West Bluff, the days when young folks had to research a paper using the Wi-Fi at McDonalds, or research a paper using a library computer, are over.”

- US Secretary of Housing and Urban Development Julian Castro

Kansas City, Missouri February 3, 2016

On July 15th, 2015, we joined President Obama in Durant, Oklahoma to officially launch ConnectHome, a pilot initiative lead by the White House and the US Department of Housing that will accelerate broadband adoption by children and families living in HUD-assisted housing across the nation. ConnectHome brings together communities, the private sector, and the federal government to expand high speed broadband to more families across the country. Working with 28 communities across the nation, we have had great success in bringing together national and local partners to promote digital inclusion. The pilot program will initially reach more than 102,000 low-income households – and nearly 200,000 children – with the support they need to access the Internet at home. EveryoneOn is the non-profit lead.

“If you’re a student and you don’t have Internet access at home...You may have to wait in long lines at public libraries or even in parking lots at the local McDonald’s just to try to get digital access...That’s not what America’s about.”

- President Barack Obama
Durant, Oklahoma July 15, 2015

Y2 Amex

As shown by the American Express documentary *Spent: Looking for Change*, money management is a big problem in America. In an age where there are many easy-to-use financial services, it’s unfortunate that Americans pay \$89 billion a year in fees and interest for alternative financial services such as check cashing services and payday loans. Clarksdale is a small town in the delta region of Mississippi and is well known for its rich historical roots in the origins of blues music. Struggling with poverty and deep historic and systemic challenges, many families live outside the financial mainstream and lack access to home Internet and financial education. Fortunately, due to an unprecedented alignment of local leaders in government, finance, and education, as well as support from national public, private, and nonprofit sectors, economic change is afoot.

In response to overwhelming statistics, American Express developed [this three-year pilot program](#) aimed at teaching 12th grade students at Clarksdale High School about financial literacy and equipping all students and their families with the technology and skills necessary to help close the digital divide. By teaching students how to understand their finances and make sound financial decisions now, we can ensure they don’t have to turn to these alternative services in the future. Over the last two years we have partnered with American Express and local Internet provider CableONE, to ensure that no student is left unconnected at home.

As of December 31, 2015 we have successfully enrolled **242** families in the CableONE free Internet program, which represents a **147 percent** increase. The program has garnered great praise from faculty and parents alike as a valuable asset for families as Clarksdale shifts to a more digital curriculum.

“That’s a no brainer, to be able to help your kid participate and have it not be dependent on my paycheck is great. I wish they had programs like this when I was in school.” -- Mr. Jones, Parent

COX Foundation and Macon, GA

Macon, Georgia is a mid-size city (population 153,691) about 90 miles south of Atlanta and located in the center of the state. Last year, the National Digital Inclusion Alliance released the 2014 rankings of America's "25 Worst Connected Cities," and Macon was listed at number 16 for households with annual incomes below \$35,000.

But with the synchronizing of various opportunities aimed at connecting Macon's low-income population with digital access, shepherded by EveryoneOn, the quest to better connect the community is making this ranking for Macon a part of the city's past.

In July 2015, Macon was among the 28 cities selected by the U.S. Department of Housing and Urban Development to participate in the ConnectHome pilot. Within weeks after that, a press conference was held in Macon to announce an exciting partnership with EveryoneOn and the Cox Foundation. Building upon the momentum of the Connect2Compete program, which has offered low-income residents with \$9.95 Cox home Internet since 2012, the Cox Foundation pledged a nearly \$250,000 grant that now couples the \$9.95 Internet offer with \$30 laptop-tablet devices. The devices are pre-loaded with educational content, like Discovery Education and Read Right from the Start, and include a free wireless router.

This grant announcement also included the naming of EveryoneOn's Macon Regional Manager to lead the effort. Jessica Walden, a Macon native who lives in Downtown Macon, was hired to implement the grant program. Unconnected residents now have the opportunity to attend enrollment events hosted by Cox and EveryoneOn, enroll in \$9.95 high-speed home Internet, and leave with a newly purchased \$30 laptop-tablet device.

Enrollment events occur throughout the city on a regular basis. In partnership with ConnectHome, EveryoneOn, Cox, the Macon Housing Authority and the City of Macon-Bibb held the first ever Click or Treat citywide enrollment event during the week of Halloween. More than 200 residents attended the event, where they learned about and connected to opportunities for home technology. Other enrollment event partners include the Middle Georgia Regional Library System with regular, monthly "Connect Tuesday" on-site enrollment events, held during the "homework hours" at two different library locations. EveryoneOn also partners with the Bibb County School system to host enrollment events at local public schools, as well as with community, non-profit partners who work with students and their families.

In February, EveryoneOn and Cox formed an exciting partnership with the Listening Post, a program of GroundSource, which enables community-based organizations to engage in direct, two-way conversations via SMS, voice and mobile messaging that gathers data and stories, and builds trusting relationships with the people being served. This technology is being used for direct outreach to the digitally underserved in Macon and engaging them with opportunities to gain home Internet access.

Since the Macon program was implemented in fall 2016, just over 70 Macon families with school-aged children have been connected to the Internet and equipped with tablet-laptop devices, often for the first time.

Avanzamos Conectados (Univision and Common Sense Media)

Mid last year Univision and Common Sense Media launched *Avanzamos Conectados*, a national campaign designed to highlight the importance of Internet connectivity at home by informing parents about the educational benefits of low-cost Internet service options and computers, and Internet safety resources, and linking them to those resources. EveryoneOn was thrilled to collaborate with Univision and Common Sense Media and make available our platform of affordable Internet service and computers offers via the *Avanzamos Conectados* website and SMS (text) platform.

Avanzamos Conectados' multi-platform approach, which included news stories, call centers, educational fairs, parent townhalls, and Twitter parties, was very successful and has resulted in over 60,000 visits to EveryoneOn's website to view the offers since August 2015. EveryoneOn joined Univision and Common Sense Media for several of these activities in Los Angeles, Miami, and Phoenix. And, to help kick-off the national campaign, a family EveryoneOn helped get connected was featured on *Despierta America*. You can view the clip [here](#). Look out for more buzz about this national campaign in 2016!

OurCycle LA

In 2015, the EveryoneOn Los Angeles office was immersed in OurCycleLA, a unique program initiated by the Los Angeles Office of the Mayor and the Los Angeles City Council to refurbish and distribute thousands of city-owned computers. By transforming computers, both desktops and laptops, into usable devices, OurCycleLA addressed the digital divide, minimized the city's electronic waste, provided job training, and created employment opportunities.

The core mission of OurCycleLA was ensuring that all Los Angeles residents are digitally included. Once computers were refurbished by the local nonprofit human-I-T, they were distributed to eligible families and individuals. To qualify, residents participated in a two-hour basic computer literacy training, facilitated by the [Youth Policy Institute](#) and Best Buy's [Geek Squad](#). The training focused on computer basics, set-up, and Internet safety. Participants also learned about and enrolled in low-cost Internet service.

EveryoneOn supported outreach efforts to local nonprofits and schools about the program, invited Best Buy's Geek Squad to participate as one of the training organizations, and led the Internet enrollment component.

Since OurCycleLA's launch in February 2015, over 400 Los Angeles households have participated in the computer training, received refurbished desktops, and enrolled in Internet service. EveryoneOn is happy to have participated in this innovative program that impacted hundreds of families. Thank you to the City of Los Angeles, the California Emerging Technology Foundation, Citi Bank, and the Roberts Enterprise Development Fund for their sponsorship and leadership to make OurCycleLA happen.

Events and Press

In 2015, it was a banner year with our on-the-ground work, particularly in our national level initiatives. Two major events for ConnectHome, the kickoff National Summit and pre-summit gathering, were held in conjunction with the White House. In addition, we attended local level summits in support of ConnectHome in cities such as Washington, D.C., Baltimore, MD; Macon, GA; Los Angeles, CA; Kansas City, MO; Tampa, FL; New York City, NY; Newark, NJ and Durham, NC.

ConnectHome Launch

President Obama traveled to Durant, Oklahoma, to announce [ConnectHome](#) in a launch event that featured members of the Choctaw Nation, the U.S. Department of Housing and Urban Development, private industry and not-profit organizations. EveryoneOn was in attendance and even received a special shout out in the President's speech. [Watch the video here.](#)

ConnectHome National Summit

In August, EveryoneOn coordinated the National ConnectHome Summit, which invited representatives from each of the pilot communities, plus national stakeholders, for a two-day summit to discuss next steps in the pilot process. In addition, EveryoneOn hosted a pre-summit at Google DC for discussion of best practices between national stakeholders and ConnectHome committed Internet Service Providers. Both of the gatherings helped provide an overall framework for the pilot and help establish EveryoneOn's status at the non-profit lead for ConnectHome.

Local Summits

Following the National Summit, the 28 ConnectHome communities were tasked to hold individualized local summits/convenings and devise a project plan, with clearly defined broadband adoption goals and long term outcomes. EveryoneOn staff (when available), city and public housing authority officials, and national and local stakeholders participated in each summit. Highlights include:

- Mayor Muriel Bowser giving a keynote address at the DC convening.
- The Baltimore convening included HUD-assisted housing residents and Maryland Office of Information Technology and explored public access and building infrastructure towards digital inclusion.
- The Housing Authority of the City of Los Angeles (HACLA), with support from the California Emerging Technology Fund, hosted a successful local convening in late October. The convening brought together the Office of the Mayor, the Los Angeles Unified School District, and numerous private and nonprofit stakeholders to discuss collaboration opportunities to maximize impact.

Conferences

This year, EveryoneOn presented and attended at a variety of national gathering and conferences. These include:

- Texas State Literacy Conference
- Virginia Institute for Lifelong Learning Conference (VAILL)
- Commission On Adult Basic Education Conference (COABE)
- American Association of National Service Coordinators (AASC)
- California Bilingual Education Conference
- International Society for Technology in Education (ISTE)
- National Council of La Raza
- Schools, Health & Libraries Broadband Coalition (SHLB)
- Future Ready Summit

What if your only Internet
was in a store parking lot?

“

Sometimes me and my mom would go just to the parking lot at McDonalds and use the WiFi to do and get what I needed to get done

Darriale Bradley
Junior, Southwest High
(Macon, GA)

Darriale Bradley

When Darriale Bradley was a junior at Southwest High School in Macon, home was not the place for homework.

In fact, most of her studying in 2012 took place at the McDonald's on Harrison Road, a spot near her home where she could connect to the Internet at no cost. Her mother, who was unemployed at the time, would drive her there almost daily.

"That's how I used to get my homework done," Bradley said. "Then I found a flyer at school, and I brought it back home to my mom and I said, 'OK, we need to get this Internet.'"

The flyer advertised home-based high-speed Internet for \$10 per month for qualified customers.

Upon learning she was eligible for the program, "I was happy as I don't know what," said Bradley, now a 19-year-old computer engineering major at Mercer University. "That Internet helped me to learn more. ... I just know that it was a big, life-changing experience for me."

Read more here: <http://www.macon.com/news/local/article60123441.html#storylink=cpy> (BITLY?)

Brigette Hammonds

Brigette Hammonds is a single mother of 5 who desperately needed a job to support her family. First, she had to learn how to find a job online. The Denver Public Library had computers and instructors ready to teach her new skills. With no money for daycare, Brigette was allowed to bring her baby with her to the library. After posting her resume online, she found a job at an elderly care facility.

Juana Gomez

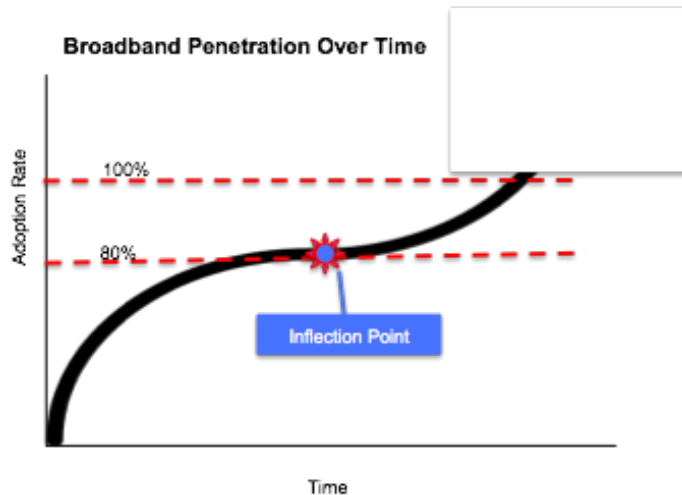

“We didn’t have enough money to buy a computer or pay for Internet. For me it was very important, and this program is very good for my kids so that they can have the opportunity to get more education” (translated from Spanish) – Juana Gomez, 46-year-old mother of 5 in San Diego.

Macon, GA

After learning of the program at an elementary school fall festival, where we had an on-site enrollment, one mother was desperate to pay off her Cox debt and enroll her six year-old daughter in Connect2Compete, with a device. It took her four months after the event before she was able to pay off her debt, but once she did, she contacted us, and we met for a 1:1 enrollment. She said the reason she was so desperate to get the device was because the teacher told her that her daughter was "gifted" and she wanted to make sure her daughter had everything she needed to continue to excel. The mother admitted that she herself struggled with reading at the same level as her daughter and hoped the apps on the device could help teach her as well.

EveryoneOn exists to close the digital divide in our time and to literally put itself out of business. Currently, only 80 percent of the country, have adopted the Internet or, put another way, more than 64 million Americans remain unconnected. Our goal is create the inflection point that takes the adoption rate from 80 percent to 100 percent, where the only thing that stands between where we are and where we want to be is time. We call it the “point of no return.”

To create that point of no return, we believe that preconditions are necessary. Our bold and threefold strategy is:

Connecting an Additional One Million Americans: EveryoneOn will continue to grow and expand our platform of offers that we have used to connect almost 200,000 households to date. EveryoneOn aims to connect an additional 350,000 households (or roughly additional one million low-income Americans total) by the end of 2018. Connecting a further million Americans is important for two reasons. First, it shows that we can move an unprecedented number of Americans from the digital outskirts to the mainstream. Second, the practices that will allow this to take place will become a bedrock of a “playbook for digital inclusion” that we hope will guide all those dedicated to this work. That playbook and the best practices in it will dramatically accelerate adoption rates in America.

Proving the Market Case For Digital Inclusion: EveryoneOn will pursue pilot projects with a range of industry partners within and outside of the telecommunications industry to show the business case for digital inclusion. This is important because there are number of industries, businesses, and business models that are enhanced and accelerated by more people being on the Internet. Our work with American Express in Clarksdale, MS shows that to be clear. Other clear examples include the healthcare, financial services, and e-commerce industries. We will seek to engage these partners in creative ways to show that shared value opportunities in digital inclusion are real and can have profound return on investment.

Driving the Policy Debate: In 2016 and beyond, EveryoneOn will add its voice to the debate on issues like Lifeline reform to ensure that America has a world-class policy framework that ensures that no American is separated from the Internet and the opportunity it brings.

At EveryoneOn, we seek the day when the digital divide is relegated to the dustbin of history, and we believe that we are on course to reach that day.

EveryoneOn is now a **501(c)(3) nonprofit organization**, and 100 percent of all donations received are tax deductible. Financial support helps us to maintain our commitment to providing high-speed, low-cost broadband, technology, and free digital literacy to ensure a fair and just future for all.

To make a charitable donation to EveryoneOn, please note that our federal tax ID (#45-4868462) may be listed as “Connect to Compete, Inc.”
